The decision of the committee of 100 on arrangements for District day at the Sesquicentennial not to feature "voteless Washington" at the exposition on October 6 was assailed by A. L. The right of William S. Vare, o Pennsylvania, and of Col. Frank L Smith, of Illinois, even to take the ath as senators will be challenged at hie outset of the first meeting of the Senate in the Seventeth Congress. Senator Ashurst, of Arizona, Democrat, member of the Senate judiciary committee, announced yesterday he would challenge the right of these two candidates, who presumably will be elect ed senators in November, to be

sworn in and to take their seats. This is the first definite statement to the effect that the right of Vare and Smith to take the usual oath and to assume their seats would be challenged the instant their credentials are presented and they seek to qualify. The usual procedure in contested election cases is to allow the senator to take the oath and enter on his duties and then, after investigation by the committee on privileges and elections, to pass on the legality of the election

Senator Ashurst, however, with the backing of his party, and probably of a number of Republicans, will seek to bar Vare and Smith from becoming members of the

body.

### Count of Primary Votes Has Settled Few Races

Returns from the primary elections held in four States yesterday, as received in Washington are still indecisive in a majority of cases.

In New Hampshire, the renomination of Senator George H. Moses, opposed by R. P. Bass, was practically assured. Gov. Winant was running behind for renomination.

Gov. J. J. Blaine, opposing Senator I. L. Lenroot, took the lead early this morning after running behind Lenroot in the early returns. Blaine is supported by the La Follette forces, whose candidate for governor is running behind F. R. Zimmerman In Nevada, Senator Oddie is

### Bread-Water Sentence Dangerous, Says Doctor

Tekamah, Nebr., Sept. 7 (By A. P.) .- Sentenced to serve the first and last 20 days of their 60-day jail sentences on a bread and water diet, because they violated the prohibition laws, Roy Carson, 35 years old, and Thomas Nelson, 50, farmers, arrived at the Burt county jail tonight.

Each declares he is a heavy eater and can not stand the bread and water sentence, recently affirmed by the State supreme court to which they appealed.

A physical examination by Dr. Lukens today resulted in a declaration by him that neither man was fit to stand the sentence, "The bread and water diet is not only cruel but murderous, because it damages the vital organs," he asserted.

"No court has the right to injure a man's vital organs because he took a drink of liquor,' Dr. Lukens said.

### Air Survey Verifies Discovery of Peaks

Twenty-three years ago John William Heskett, Oakland, Calif., saw three beautiful mountain peaks while crossing Taku inlet, Alaska. Prospectors denied his report, but its correctness was verified yesterday by a report and photograph reaching the Navy Department from Lieut. B. H. Wyatt, in charge of the navy's aerial survey of Alaska now being made.

Mr. Heskett asked Secretary of the Navy Wilbur to have the survey corroborate his story of the cathedral-like mountain, and Secretary Wilbur forwarded the communication to the survey. The aerial photographs of the survey verified Heskett's claim.

BEAUTY AND YOU

-By VIOLA PARIS-

DEAR MISS M'DONALD: I am a young wife. Have a beautiful child and a nice home, the result of my earnings, but I am "blessed" with a jealous husband who is always nagging. I am true, patient and ambitious. He finds so much fault with me, mostly because I am not as affectionate as I used to be—but I can't respect him. come and the good cheer. The hus-My husband is very selfish. After marriage I worked for over a year and a half and had to give him hall to keep the burglars away. If

and a half and had to give him my whole pay in order to live. He posed as being "well off" until after marriage. Now, ever since the baby was born, I do a family washing in order to get spending money and things for baby and myself to wear. He says I ought to be willing, since I no longer have a job. Now, I am expecting to receive a nice amount of money soon, which is the result of injuries I received in an auto accident. John has been "very sweet" to me lately. I told him I was going to put it in the bank, but he can't see any sense in that. He says I'm a poor partner if I don't give it to him to use. He bank, but he can't see any sense in that. He says I'm a poor partner if I don't give it to him to use. He said if he found out that I was that small as to keep it, he'd pack up his things and "get out." He doesn't want me to have anything of my own and if I ask him for anything, he says, "How about your wash money?"

I am young, 24, and all alone out here with baby, far from town. My nearest neighbor is half a mile away and they are seldom home.

Sould prefer to move hext door to a firehouse.

You are, after all, "captain of your soul," and it is for you to say whether you shall continue in your seent state which is quite a bit lower than that of the woman who is regarded by her husband as a by him for you are maintaining the man. Draw your own conclusions to receive—and in regard to the years that lie ahead.

NINE.

A GREAT many of the woes of adult life seem to come from our teeth; but adult teeth are the inheritors of what our mothers did—or didn't do—to the finy teeth that came before. So, in the hope that future beauty may be saved to the world, I am going to try to set the mothers of the younger generation on the road to safety first—to the exclusion of expensive bridge-work later on.

Mouth hygiene ought to begin even before the first teeth appear. A scrap of clean, soft old linen wrapped around a gentle finger and dipped in an antiseptic solution should be used in the tiny baby's mouth two or three times a day. Such solution may be merely sait water, soda water, or a blend made of half a teaspoonful each of salit and baking soda in a glass of warm water, or it may be one of the gums should be gently massaged. As soon as a child is old enough to hold a toothbrush, he should be

There is no harm—and please, mothers, leaving the contains and probably to be gind the rite as a means of preserved and gring them personalties. The two upper front ones were the king and queen, and the feet hand giving them personalties. The two upper front ones were the king and queen, and the four new molars come to take on the burden formerly carried by the baby teeth which are beginning to fail out and be replaced. These molars, for some reason, seem more liable to decay, and great care must be taken of them. HOW TO APPLY WET PACKS.

A WET pack should be so applied that the cold, wet sheet touches all the skin, no large air pockets are left, and the blankets cover the sheet snugly. Here is the best method of accomplishing this:

Provide a single cot or a single bed and cover the mattress with a rubber sheet or with oil cloth. Provide an ordinary sheet, two large, long blankets, preferably gray, three soft towels, or one soft towel and a rubber ice cap for the head.

Spread blanket on the cot so that the foot end hangs down 8 to 12 cross the body and tucked in along the right side. The bottom blanket is a long the right side. The bottom blanket is applied in the same way. The blankets must fit the body and limbs closely, leaving just as few air spaces as possible.

The top of the blankets fitting around the neck are covered by a soft towel or prevent irritation of the skin of the neck. The other towels and a rubber ice cap for the head.

Spread blanket on the cot so that the foot end hangs down 8 to 12 cross the body and tucked in along the right side. Then the right edge is carried across the body and tucked in along the right side. Philadelphia, Sept. 7 (By A. P.) remaking of the entire social order in mastery of the atom by science was foreseen by Prof. James F. Norris, of the Massachusetts Institute of Technology, in his annual address tonight as president of the American Chemical society.

Destroy Social Values.

Pointing out that such a discovery would destroy our present system of social values, he predicted "an economic upheaval" would force upon the world a change from the present unsatisfactory system based upon gold to a more rational one based on something more fundamental—perhaps the value of a man's labor, or on necessary commodities." He declared property rights in natural resources would disappear.

### SENATOR HARRISON RETURNS.

Versatlle "Pat" Harrison is back after a sofourn in Europe, whither he went, as he says, to study the situation. Judging from his first interview, which the senator no doubt gave with great reluctance, he was not silent while abroad. He admits that he "told them a few things," and asserts that he returns more firmly convinced than ever that cancellation of war debts is an impossibility.

More than 10,000 tourists disembarked in New York with the Mississippi senator, and thus supported his theory that American travelers should be ordered to return home from France and stop spending money where American dollars and cents are not appreciated. Of course, this exodus from European countries may be due to the fact that the tourist season is coming to an end; but they are coming home just the same, so "Pat" is right about it.

"America," he says, "shall know the facts, and we will see if debt settlements already arranged shall be discarded and confusion added to the chaos by those few in America who seek to cancel them."

Inasmuch as the French debt settlement is still to be approved by the Senate, it will be interesting to see whether Senator Pat, when the debate begins, will support the administra-

The country will await with ill-concealed impatience to learn the full measure of the information obtained by the Mississippian on this memorable trip. He is opposed to cancellation, and in that respect he is a political bedfellow of President Coolidge. It is hoped that he will be stalwart in opposing efforts of his own partisans to throw the French settlement into that mysterious limbo which he characterizes as the "discard."

### QUARRELING OVER MANDATES.

Foreign Ministers Chamberlain and Briand are finding fault with the mandates commission of the league of nations for exercising "inquisitorial" powers. The mandates commission is supposed to receive annual reports from the governments holding mandates, and to act in behalf of the league of nations in requiring the mandate powers to comply with all their obligations. The commission sent out questionnaires to the mandate governments, inquiring minutely into their adminis-tration of "backward peoples," and both Mr. Chamberlain and M. Briand have found fault with what they describe as an attempt by the commission to govern the mandate countries, instead of merely receiving reports as to how they are governed.

It was inevitable that there should be friction between the league of nations and governments holding mandates, if the league should attempt to hold those nations to account. France insists upon a free hand in Syria, while Britain resents any interference with her administration in Mesopotamia.

The mandates commission had the hardihand to receive petitions from aggrieved natives of countries under mandate. The foreign ministers of Britain and France contend that this exceeds the powers of the commis-

When the mandate system was criticized by Americans as a subterfuge whereby the great nowers obtained possession of former enemy territories, the spokesmen of the powers replied that the league of nations had full power of supervision through its mandate commission. "We are required to report annually and give an accounting of our stewardship," said these spokesmen. "Nothing can be done that will not be exposed to the full light of day. The mandates commission can put a stop to any abuses that may develop under our adminis tration of mandate territories."

But when the test comes, and the mandates commission attempts to exercise supervision, both Britain and France protest and threaten to force a change in the personnel of the mandates commission. The delegates of Belgium and Japan joined the French and British delegates in denouncing the "interference" of the mandates commission. Both Belgium and Japan hold mandates over former enemy territories. Another objection to the mandates commission was voiced by Gen. Jan Smuts, the oily individual who devised this scheme for turning enemy territories over to the great powers according to the terms of secret trea-

ties made as early as 1915. A cable from Geneva says that members of commission will demand a "showdown' this week in the league assembly. They will demand to be informed whether they are rensible for the welfare of the peoples of mantate territories, or whether they are to be nerely a rubber stamp for concealing mis

ent in those territories. With Germany a member of the league and ts council it is quite probable that the mante question will be thrust to the front. The

pressure, from Germany for a share of the colonial possessions wrested from her is having its influence upon the German delegates. The German government has shrewdly "softpedaled" its demands, pending admission of Germany into the league, but once in the charmed circle there will be no further occasion for concealing Germany's ambition to regain lost territories.

### SECRETARY JARDINE'S PLAN.

Secretary of Agriculture Jardine has outlined to a Kansas audience his plan for farm relief. He suggests the formation of sectional or regional cooperative associations, each association confining its operations to one commodity. He suggests that these regional associations organize and borrow money from the government at 4 per cent interest, and loan it, out to the farmers at 6 per cent, using the 2 per cent balance for overhead expenses and cost of operation. Such a plan is practicable under the law passed by Congress establishing a cooperative bureau in the Department of Agriculture.

Mr. Jardine believes that it is impossible for the farmers to act individually in taking advantage of market conditions, but that regional cooperatives, each handling only one commodity, may be able to obtain the best possible Farmers, he thinks, must be organized along the lines that are adopted by manufacturers

Mr. Jardine reiterates his opposition to the McNary-Haugen bill, on the ground that it is a price-fixing measure, which is a violation of economic principles. The problem of farm relief, he insists, is largely a matter of distribution. If the cost of distribution can be reduced the farmers will obtain better prices for their products.

### TREASURY ISSUES.

The Treasury has issued a circular announcng an offer of 31/2 per cent certificates of indebtedness totaling \$350,000,000, maturing on June 15, 1927. Interest will begin November 15, 1926.

This is the first financing that has been nec essary since last March, when 3 % per cent 30-year bonds were issued. The condition of the Treasury was sufficiently favorable, due to large receipts and collection of back taxes, not to require new financing in June. Treasury notes due September 15, and totaling \$414. 922,000, will be paid and retired. These Treasury notes bear 41/4 per cent interest.

The Treasury will accept in payment of the new certificates the Treasury notes of series B, 1926, as far as desired. The exchange will save the Treasury three-fourths of 1 per cent interest annually.

The present offering is intended, with the balance on hand and income tax receipts due on September 15, to cover the Treasury's further cash requirements until December 15.

### ELECTRICITY FROM WATER POWER.

The production of electric power by public utility corporations in the United States in July last reached the total of 5,900,928,000 kilowatt hours. This enormous energy was developed through the consumption of 3,339,198 short tons of coal and 699,917 barrels of crude oil, in those plants which use fuel for the creation of electrical energy, and from which was developed 3,907,767,000 kilowatt hours, while water power was the basis of the other 2,000,-000,000. The production from water power compared with the June output, and nearly 20 careening car. per cent as compared with the May production.

The geological survey, which furnishes these figures, says that the daily average production of electricity during July by the public utility plants was about 3 per cent less than the aver age in June. There was an unprecedented falling off in the daily average production from the use of water power in July as compared with the preceding month, due to the small rainfall throughout practically the entire country. However, the extensive rainfall during August in the eastern section of the country to some extent relieved drought conditions.

In the meantime the development of elecrical energy from water power promises to increase enormously in the near future. Nearly every province in Canada is actively engaged in harnessing its water power. Millions have been invested in the Saguinay region in Quebec; New Brunswick was recently authorized to develop the power of the St. John's river on the border of Maine: a Canadian company is preparing to harness the St. Lawrence within the boundaries of Ontario; and a joint survey by engineers of the United States and Canada is ooking into the plan of harnessing the outlets of the Lake of the Woods and Rainy lake. Other projects are in contemplation in British Columbia, Alberta and Saskatchewan, and the Kootenay river project on the border of Idaho is under consideration by the international joint commission.

Besides these the State of New York has authorized the initiation of projects in the Adirondacks and the Genesee country, which will add largely to the total production of electric power in that State. It already produces more than one-sixth of all the power developed from the use of water in the entire country.

# THE CASE OF MR. GLASSIE.

Certain influential Democrats are petitioning President Coolidge not to reappoint Commissioner Glassie to the tariff commission, on the ground that he is a protectionist, at least so far as sugar is concerned. Senator Bruce, a member of the Senate committee that investi gated the commission and Senator Harrison Democratic leader in the Senate, are reported to have protested against the reappointment of Mr Glassie

On the other hand certain Western Democrats, especially those from the States producing beet sugar, favor the reappointment of Commissioner Glassie, because he favors the protection of American sugar against foreign, and especially Cuban, sugar.

This division of the Democrats over the question of Mr. Glassie's reappointment typifies the split growing in the Democratic party over

This division of sentiment has been apparent for some time, and has given some of the old line Democrats considerable uneasiness.

The law creating the tariff commission requires that no more than three members shall belong to the same political party; therefore the next appointee must be a Democrat, whether it is Mr. Glassie or another man. If President Coolidge listens to the protests of one wing of the Democratic party, or the wishes

of the other wing, and makes a decision, he will acting as an umpire between the two fac-

tions, which is hardly fair to the President. In connection with the protest against the reappointment of Mr. Glassie because he is a protection Democrat it is interesting to recall that the late President Wilson, when the commission was first created, appointed some Republicans to the commission who were wellknown low tariff men. There was no objection

nonpartisan organization, for the ostensible purpose of taking the tariff out of politics. With that initial fact in mind, it is difficult to see any consistency in the objecton of a few Democrats to the reappointment of Mr. Glassie

More than two months have elapsed since the President signed the bill to readjust the pay of the retired civil employes of the government, but as yet no one has benefited 1 cent from that act. Secretary Work reports that during the last fiscal year the amount in the fund was increased by \$9,996,767 and that the total on June 30 was \$54.662.546.

During the discussion of the various bills which were considered in Congress in the last session columns of figures were incorporated into the record designed to show just how much in the way of appropriations would be required to meet the increases asked. These figures were based upon the report, after investigation by a corps of accountants, actuaries, and "experts" of various degrees of ability. They would appear to have furnished complete information to enable the disbursing officers of the Interior Department to pay the increases authorized without any delay whatever. Yet after two months it seems that still further "information" is required before the increased pittances authorized can be distributed among the benefic aries. Meantime it might be well for some of those experts in vital statistics to figure out just how many of the retired clerks who reached the age of 70 before retiring will have passed away before the will of Congress is carried out. Why this delay?

### SAFE LOADING PLATFORMS.

There is merit in the suggestion of the acting director of traffic, Col. Moller, that flashing beacons upon heavy concrete bases be erected at the ends of every street car loading platform in the city. The plan looks to the protection of pedestrians awaiting street cars, and recent cases of reckless driving prove that safety is not always assured those who occupy such platforms.

Col. Moller suggests that if drunken or reckless drivers crash into the ends of plat forms thus guarded the persons most likely to be injured will be the drivers themselves and not innocent bystanders. In constructing these beacons the artistic requirements of the fine arts commission cam be complied with. The main thing, however, is to afford a reasonable degree of safety for those compelled to await the arrival of street cars. The mere painting of lines on the pavement does not do this. The slightly elevated platform affords some measure of safety, but not when a drunkshowed a falling off of about 14 per cent as en driver sits behind the wheel of a madly

# FOOLING THE REDS.

A group of volunteer directors of American foreign policy is in Russia, headed by Sherwood Eddy. The purposes and caliber of these Americans may be judged by the following remarks made by Eddy to the communists who welcomed them:

Yours is a country where man no longer exploits man. I am glad to see a nation which stands as a challenge to the rest of the nations ruled by swollen, selfish capitalism. Our group intends to study facts and report them to America upon our return. We hope that this group will be the forerunner of an official group and recognition of the present government of

That is a handsome tribute to the soviet which is entitled to some return for financing these American workers in the holy cause of world revolution. But it is a shame to take their money. Sherwood Eddy is a mem ber of the international committee of the Y. M. C. A., and it is not surprising that Y. M. C. ONE can not go about Europe without thinking much about war and peace. The life of this continent has swung like a pendulum from war to

peace and from peace to war throughout the centuries.

As I walked through the Palace of Versailles the other day, the almost endless stretch of paintings left me with a sickening sense that the ruling powers of mankind have thought of little else than war, for there is hardly a canvas in Versailles that is not reminiscent of some battle in which a king of France strutted his hour on the stage.

Finally, in one of the smaller rooms of the palace, I caught sight of two paintings hanging over the doors, facing each other across the

TO be well, one must have good elimination. Modern life brings an unusual strain on our bodily mechanism. We work too hard, as a rule, eat too much, and get too little sleep, fresh air and exercise. A sluggishness of bodily functions often results.

Good health requires good elimination. If the kidneys fail to fully perform

their functions, body poisons are left in the blood stream, and one is apt to feel languid, tired and achy. A dull back-ache is sometimes a symptom with drowsy headaches and dizzy spells. That

By F. W. PATTERSON.

While the functions of each committee of the District Bankers association have an important bearing on the results accomplished at the end of the year, there is none that has a more valuable and essential work to perform than the committee on commercial trade activities, so that it is but natural that when President Moran was looking around for a leader, or chairman, he chose Victor B. Deyber, president of the Second National Bank, for that important assignment.

As the purpose of this committed is to study the commercial circles of Washington so as to prepare data and give bankers a clear and adequate knowledge of what is transpiring in its commercial life, thus enabling them to intelligently foster its development, the committee has been divided into four sections so that the scope of these activities may be fully and carefully covered.

CURB MARKET REVIEW. New York, Sept. 7 (By the Asso-cated Press).—Stock prices moved ir-regularly higher in today's curb mar-ket, which broadened out as new speculative groups got into action. Bear traders, however, continued to ferret out weak spots in practically all groups, concentrating on issues

all groups, concentrating on Issues in which bull pools had failed to attract a speculative following in recent upward movements.

Oils were mixed, with speculative opinion divided as to the effect of the oil conservation board's report, predicting a domestic oil shortage within six years. Humble, Prairie, Vacuum and some of the other high grade issues improved fractionally, but Gulf, which was strong last week, broke nearly 4 points on realizing, with a similar loss recorded by Reiter-Foster. Redeemable, but only as to the whole amount of any one or more maturities, at any time, at the option of the Company, on 60 days' notice, at their principal amount and accrued interest plus a premium of ½% for each year or fraction of a year of unexpired life of each maturity so redeemed. THE CHASE NATIONAL BANK OF THE CITY OF NEW YORK, Authenticating and Paying Agent

Mr. Jesse Isidor Straus, President of R. H. Macy & Co., Inc., has furnished the following information regarding the Company and this issue of its Gold Debenture Bonds:

# EARNINGS

"Net sales and net profits of R. H. Macy & Co., Inc., before Federal Income Taxes, available for interest, as certified by Messrs. Touche, Niven & Co., have been as

Year Ended February 3, 1923 \$49,615,229 \$3,546,942 February 2, 1924 51,232,360 3,737,887 January 31, 1925 56,369,795 3,355,698 January 30, 1926 66,505,459 4,813,815 12.2

The average of such earnings is \$3,863,585 per annum, or over 9.8 times the interest requirement for the Serial Debenture Bonds. For the six months ending July 30, 1926 of the current fiscal period, net sales were approximately 15% greater than those of the corresponding period of 1925. It is estimated that net profits for the same period have increased at least in proportion.

# ASSETS

The consolidated balance sheet as of January 30, 1926 of R. H. Macy & Co., Inc., and subsidiary realty company, showed net assets, excluding goodwill, of \$27,144,986.

The common stock alone, at the current quotation on the New York Stock Exchange, reflects a market valuation of over \$40,000,000. The balance sheet shows net current assets of \$8,282,203, cash alone being greater than total current liabilities. current liabilities. The Company will have no funded debt, except these Debenture Bonds and \$300,000 mortgages on properties when purchased, due 1927-9.

These Debenture Bonds are to be the direct obliga-tions of R. H. Macy & Co., Inc., which will agree not to mortgage or pledge any of its fixed assets, except by way of purchase money mortgage, unless these De-benture Bonds share in the lien of such mortgage or pledge equally and ratably with other indebtness secured thereby.

OBLIGATION

# PURPOSE OF ISSUE

The proceeds of this issue of Debenture Bonds will be applied toward redeeming the \$3,800,000 par value 7% Cumulative Preferred Stock which the Company has elected to redeem at 115 and accrued dividend on December 15, 1926. The balance of cash necessary for this purpose will be supplied by the Company out of its accumulated earnings."

Pullman Shows Biggest Gain, With Other Leaders Decidedly Strong.

### RAILS SET EARLY PACE

Special to The Washington Post. New York, Sept. 7.—An upswing near the close featured today's session of stock trading on the stock exchange—a session that saw a variety of movements in both direc-At the finish prices were generally higher, with gains ranging up to 71/2 points freely scattered through the list, but a few important issues had failed to come back after slumping rather badly. After the three-day lay-off, dealings were fairly large in volume, sales totaling more than 1,715,000

shares.

The rails, equipments, and oils were the favorites in the forenoon trading and a number of the members of these groups held strong through the latter session, but General Motors, which had sold off at the opening, began climbing in the afternoon and soon was 8½ points above Friday's closing level at 219, the highest price in two weeks. It closed 7¼ net higher, its turnover totaling 121,000 shares.

United States Steel common, too, recovered from a lethargic morn-

United States Steel common, too, recovered from a lethargic morning and went temporarily above 152. Pullman finished with the day's biggest net gain, 7½ points. DuPont followed the lead of General Motors and closed 5 % up, and Woolworth gained 6 % on the day, while Union Tank Car, Western Union, United Drug, Radio Corporation, and some more, showed advances ranging from 3 to 5 points at the close.

The day's only dull period was directly following the announcement that cail money which had renewed at 4½ per cent, had gone to 5 per cent. But the effects, it any, were quickly shaken off, and the advance proceeded.

The rails set the pace early. Within the first hour, New York Central, Great Northern, preferred and Frisco common sold at new high prices for the year, the first named coming within a quarter of a point of its high since 1906, and Frisco within the same range of its high for all time. But none of these shares held their gains, all three closing at fractional net recessions. Some others, however, including C. & O., took up where the early leadclosing at fractional net recessions. Some others, however, including C. & O., took up where the early leaders left off, and maintained goodsized gains. Chesapeake & Ohiopreferred on a single sale went 5½ net higher. Oil shares were immediately affected by the report of Secretaries Wilbur, Hoover and Dwight Dayis to President Coolidge that, in theory at least, the oil supply of this country would last only another six years.

Marland boomed up to 61, higher than it had been for more than a month, but failed to hold more than a fraction of its rise. Pan-American

than it had been for more than a month, but failed to hold more than a fraction of its rise. Pan-American shares did better, as did a number of the others, including Houston, which gained 3½, and Atlantic Refining, up 3 points.

Yellow Truck & Coach, a General Motors subsidiary, participated in the advance for a gain of 3½ points, reaching a new high for all time, but some of the other automobile stocks were decidedly weak, Mack Truck among them, and Willys Overland, which breasted all of last week's recessions, sagged off. Hudson and Studebaker finished at moderate advances, after having dipped under Friday's closing.

Before midday there was a burst of buying in Armour stocks and prices held firm subsequently, although demand slackened. Continental Bakfng shares, which made an impressive showing last week after their promotion from the curb, developed sudden weakness, the A stock closing 3½ net lower and the B finished 1½ down.

Store shares showed a lack of unison, few following Woolworth's

unison, few following Woolworth's example. Kinney broke 6 % points and Kresge Department Stores sold off. In Tobacco there was no definite trend. In the sugar continuous control of the sugar control

and Kresge Department Stores sold off. In Tobacco there was no definite trend. In the sugar group American Beet preferred hit a new 1926 low, down 4 ½ net.

Acute weakness in sterling featured the foreign exchange market, the pound dropping %c to \$4.85 % for cables, subsequently recovering to \$4.85 %. French francs held fairly well, Belgian francs yielded more than 2 points and lire dropped 9 % and pesetas 14 points. Most Scandinavian rates also went slightly lower.

Praised by President.

Paul Smiths, N. Y., Sept. 7 (By P.).—The death in Washington of Mai Arthur Brooks, negro steward at the White House, and valet to the Presidents since the time of William H. Taft, was announced sorrow today by Prest-

Rediteld Proctor, Stephen Elkins, Daniel S. Lamont, Russell A. Alger, Elihu Root and W. H. Taft, from 1881 to March 4, 1909, when he went to the White House as a bonded official. His service as custodian covered a period of 17 years, During this time he utilized his knowledge of military affairs to effect a sartorial censorship over the presidential heusehold and was quickly recognized as an authority on dress for all occasions. Intimate contact with men of affairs for more than a quarter century afforded however, no breach of confidence, although it is known that many officials high in public life confided in him, and had respect for his keen judgment of men.

Lieut, Col. Brooks was a native of Port Royal, Va. coming to this city at an early age to take service in the War Department, as chief messenger, under Secretary George W. McCrary. He will be buried Friday afternoon at 2 o'clock from St. Mary's Protestant Episcopal church, Twenty-third and H streets northwest, where he was a vestryman for more than 20 years. The Rev. O. L. Mitchell will officiate. Interment will be at Harmony cemetery.

He is survived by a wife. Mrs.

in Trim! Good Elimination Is Essential to Good Health

T O be well, one must have good elimination. Modern life brings an un-

usual strain on our bodily mechanism. We work too hard, as a rule, eat too much, and get too little sleep, fresh air and exercise. A sluggishness of bodily functions often results.

Good health requires good elimination. If the kidneys fail to fully perform their functions, body poisons are left in the blood stream, and one is apt to feel languid, tired and achy. A dull backache is sometimes a symptom with drowsy headaches and dizzy spells. That the kidneys are not functioning properly is sometimes shown by burning or scanty passage of secretions.

While, naturally, all backaches do not come from the kidneys, if you have reason to suspect that your kidneys are not properly filtering the blood, take things casier for awhile, drink plenty of pure water, and assist your kidneys with a stimulant diuretic.

Users everywhere recommend Doan's Pills. Doan's act on the kidneys only. For more than forty years they have been winning friends. Ask your neigh-

For the six months ending July 30, 1925 of the current fiscal period, net sales were approximately 15% greater than those of the corresponding period of 1925. It is estimated that net profits for the same period have ncreased at least in proportion.

The consolidated balance sheet as of January 30, 1926 of R. H. Macy & Co., Inc., and subsidiary realty company, showed net assets, excluding goodwill, of \$27,144,986.

The common stock alone, at the current quotation on the New York Stock Exchange, reflects a market waluation of over \$40,000,000. The balance sheet shows not current assets of \$8,282,203, cash alone being greater than total current liabilities. The Company will have no funded debt, except these Debenture Bonds and \$300,000 mortgages on properties when purchased, due 1927-9.

These Debenture Bonds are to be the direct obliga-tions of R. H: Macy & Co., Inc., which will agree not to mortgage or pledge any of its fixed assets, except by way of purchase money mortgage, unless these De-benture Bonds share in the lien of such mortgage or pledge equally and ratably with other indebtness secured thereby.

# PURPOSE OF ISSUE

The proceeds of this issue of Debenture Bonds will be applied toward redeeming the \$8,800,000 par value 7% Cumulative Preferred Stock which the Company has elected to redeem at 115 and accrued dividend on December 15, 1926. The balance of cash necessary for this purpose will be supplied by the Company out of its accumulated earnings."

Tax Returns Show More Than 100.000 Concerns in Wholesale and Retail Trade.

### ONE-THIRD LOST MONEY

By WILLIAM P. HELM, Jr. More than 50,000 corporations More than \$0,000 corporations are competing this year, Federal tax returns indicate, for the retail trade of the United States. Another group of about \$0,000 is engaged in the wholesale trade, including jobbers and commission firms of all kinds. Combined they will sell about \$40,000,000,000 worth of goods.

Somewhat more than 10 cents out of every dollar spent in whole-sale or retail corporate trade will and its way into the cash registers and its way into the cash registers of not to exceed 24 mammoth corporations. These concerns will take in, all told, from \$4,000,000,000 to \$5,000,000,000 in gross receipts during 1926. They include the big mail-order houses of the country, some chain stores, a few department stores and a group of big-casital wholesale concerns. big-capital wholesale concerns. They will skim the cream of whole-sale and retail profits, and in doing so will show net earnings averaging not less than \$8,000,000 to \$10,000,000 apiece. This estimate is based on what

actually happened in 1923, when the volume of trade was not so In that year fifteen mammoth cor-porations dominated the wholesale and retail markets of the country. with gross receipts of about \$3... 500,000,000 and with net profits which ran to more than \$125,000. 000. That profit was about 10½ per cent of the entire profit made by the 100,000 concerns which reported their affairs to the income tax people at Washington.

### OIL ISSUES MOVE UPWARD

Agriculture Color in the color New York, Sept. 7. (By the Associated Press) .- Bond prices contipued to hold firm today although here were no new developments luring the three-day recess to alter be general character of trading. The interest of the investment market centered mainly on prospective new financing, including the \$350,-000,000 United States Treasury issue of certificates announced for September 15 and the \$20,000,000 can for the state of Prussia which will be sold this week.

Railroad liens again held first place in buying favor, several issues with speculative possibilities such as Norfolk & Western convertible 6s and International Great Northern 58 and International Great Northern adjustment 58 mounting to new top prices for the year. Price movements in this group were not uniformly upward, however. Guif, Mohile & Northern 25 1/28 fell back 3 noints, while Denver & Rio Grande Western 58 and New York, Susquehanna & Western 58 lost about a point each.

nanna & Western 5s lost about a point each.

The impressive strength of Italian government 7s, which reached a new high price on the current movement at 91%, was the most conspicuous feature of trading in the foreign group. French issues were firm but Rheineibe 7s, Saxon Public Works 7s and other German bonds failed to retain their early gains.

Oil company obligations followed the upward trend of these stocks, with gains of a point or more recorded by Skelly 6½s and Superior Oil 7s. Other points of strength in the domestic list included Bell Telephone of Pennsylvania refunding 5s, Bush Terminal 4s, Wilson 1st 6s. Robbins & Myers 7s

and General Asphalt 6a.
Public offering will be made tomorrow of \$8.725,000 participation certificates secured by 6 per cent wold notes of the Eric Railroad, formerly held by the director gen-oral of railroads and now deposted under a deed of trust. The certifi-

cates, which do not represent new financing on the part of the railroad, are priced at 100.75.

Other financing tomorrow will include \$7,500,000 5 ½ per cent serial debenture bonds of R. H. Macy & Co., priced to yield 4.75 per cent to 5.25 per cent, and \$2.000,000 Butterick Publishing Co. 6 ½ per cent debentures, priced at par. A \$4,000,000 lasue of 5 ½ per cent 20-year bonds of the Interstate Iron & Steel Co. has been purchased by a banking syndicate and will be offered soon at 99 1/2.

in Field of 64.

New York, Sept. 7 (By A. P.).
Tennis officials today gave recognition to the brilliant tournament performances of Vincent Richards by seeding him second to William T. Tilden in the draw for the national championship next week at Forest Hills, N. Y.
Observers accepted the action of the tournament committee as indicating a leaning toward Richards for No. 2 singles position on the defending Davis cup team, a place filled last year by William M. Johnston, of California. Tilden, as national champion, already has been generally looked upon as certain to be named No. 1 player on the team, which begins play against France in the challenge round Thursday in Philadelphia.

Six other Americans and eight

HANDLER has drawn keen opposition for his first, round match, being bracketed with Brian I. C. Norton, of San Antonio, Tex., former Wimbledon finalist.

Liano, of Mexico.

In the first quarter with Tilden are Chapin, Tawara and Cochet, while Williams, Alonso and Lacoste are in the second quarter, and will have to be passed by Tilden in his attempt to reach the final.

round Thursday in Philadelphia.
Six other Americans and eight foreigners also were seeded in the field of 64 starters. Edward G. Chandler, the intercollegiate champion, and Alfred H. Chapin, jr., of Springfield, Mass., two of the group, were not members of the first ten last year.

ESPITE the decision given by the judges in favor of Eddie Leonard, the majority of the young first of the first ten closure convinced that Eddie Buell. Washington's one-eyed boxer, is every inch as good as the Baltimore. 1,000 fans on hand at the Kenil-worth arena last night left the inclosure convinced that Eddie Buell. Washington's one-eyed boxer, is every inch as good as the Baltimore youngster and that he proved it in their 12-round bout. At any rate the volume of booing led one to that belief.

True, Leonard was the more rugged of the two and put over some hard rights, which are always popular scores, but the judges evi-

popular scores, but the judges evidently overlooked Buell's stabbing

of their playing in this country for the last two or three years.

The seeded foreigners are Rene Lacoste, Jean Borotra, Henri Cochet and Jacques Brugnon, of the French Davis cup team; Tsummio Tawara and Teizo Toba, of Japan; Jack Wright of Canada, and Manuel Lane of Mayica.

DRAKO appeared armweary in the last round
when Cheslock woke up to
carry the session by a slight
margin, much to the delight of
the crowd.

Fumbles Behind Mays Costly; Cincinnati Loses Ground.

Cincinnati, Sept. 7 (By A. P.).
Cincinnati lost a lot of ground
in the National league race when it dropped a game to Chicago by 8 to 5, while St. Louis won over Pittsburgh: Fumbles behind Carl Mays cost a number of runs, while the Reds did not take advantage of the hits they made off Kauffmann and Bush. With a sure double play in his hand in the first inning, Critz muffed Dressen's assist. He also let a grounder go through him later.

# First Round at Cheuy Chase.

Twith the beneficent influence of Old Sol, whose warm rays speedily dried out the courts once he got on the job, nearly all of the first round of matches in the Harding memorial cup tournament were staged yesterday afternoon at the Chevy Chase club courts. The courts were unplayable in the morning, but shortly after noon they became firm enough to allow play and the initial contests were staged as rapidly as possible.

Otto Glockler, who is conducting the tourney, announced last night that the boys who were not present for their first round matches yesterday were excused from being defaulted. However, he added that all who did not play yesterday must be on hand this morning, weather permitting. The winners will play their second round matches later in the day.

Maryland always plays in Baltimore, the annual clash with Johns Hopkins on Thanksgiving day being decided in the Menumental City, and if the Old Liners do not stage a contest in Washington this season it will be the first time to many years that they have not

done so.

In fact, Washington claims Maryland as one of its "home" teams, as it is perfectly justified in define so, and not alone because the Old Line institution is situated only a few miles from the District of Columbia.

THERE are scholastic reasons for this also, as the College of Agriculture and the experiment station of the university are run in close cooperation with the United States Department of Agriculture, and for those reasons students matriculating from the District of Columbia are accorded the same privileges as those from the State of Maryland.

A large percentage of the stu-dents at College Park are from the District of Columbia and the Wash-ington high schools contribute most materially to the Old Liners' ath-

PRESIDENT GRIFFITH is just about breaking even on expenses in booking these two games, but is glad of the opportunity, for experience in the past has shown that more than a day of loafing has proven harmful to the Capital City baseball machine.

Tufts college will have to worry along without the services of Bill Morrell this season for the first time in seven years. For four seasons the Nat's rookie flinger has starred on the gridiron as a player, while the other three found him as coach of the Yearling eleven.

Rumor has it that Bill could have graduated to varsity instructor had he not had baseball ambitions. The pitcher not only passed up this opportunity, but on the recent trip to Boston turned down an offer to instruct the freshmen again, acceptance of which would have made it necessary for him to have made it necessary for him to have left the Nats and reported for duty in Cambridge this week.

While Fred Marberry has no close rival for relief pitching leadership in the Amercan league, there are several flingers in the senior circuit who have performed wth great frequency. Enjoy Extra Goodness

It's that finishing touch in the manufacture of Lucky Strike cigarettes which is distinctive.

To begin with, they are made of the world's finest Turkish and domestic tobaccos, properly aged and perfectly blended.

But extra goodness comes from a costly added process, a final touch-

Lucky Strikes are distinctive because of:

1. Finer Flavor. Toasting for 45 minutes develops the hidden flavors of the world's finest Turkish and domestic tobaccos.

2. Smoothness. Toasting for 45 minutes removes all "bite" and harshness, hence never any throat irritation.

3. Freshness. Then the tobacco is suddenly chilled, This seals the flavor in and insures constant freshness.

If you haven't yet adopted Luckies, you're missing these added enjoyments

So smoke them for a trial. Learn why millions prefer them.

The Boston Red Sox appear to be out for a big league record this season, although they still have quite a way to go. This mark is one that may be forced on them for, unlike most records, it is not one which they crave, but is one which they crave, but is one which may be wished on them by their tender-hearted opponents.

By dropping a game in New York yesterday they brought their consecutive-game-losing streak to 17—just 7 less than the mark set by Cleveland in the National league in 1899. The Hub team of 1906 holds second honors (2) in this respect, with 20 consecutive losses, 19 of which were received on the home field. THINK that a mashie that is on the light side is better. The mashie shot is a delicate that requires control more than power. With a heavy mashie you are apt to be a bit lazy with your swing, and lack the firmness that is necessary for this stroke.

I recall that Bobby Crulekshank, when he was my partner for the winter season a year ago, tried using a heavy mashie, but quickly discarded it; giving the reason that I have just mentioned.

In regard to the shaft, there should be no whip at all. However, the club should not have a thick, heavy shaft. It should be thin but atiff, with most of the wood taken off underneath the grip. This will throw the feel toward the head, where it should be.

As yet, George Washington is without a field of its own in town, but Coach Crum is working toward getting a permanent home for his athletic squads. If no other place is obtainable, the team will fol-low last year's practice by using the field at Potomac purk.

With the Hatchetites, Coach Crum has several problems which cause him no little concern. He has yacht club grounds as her own monument to the boat engineering of her time.

Sign With Giant Eleven

Asbury Park, N. J., Sept. 7 .-Jack Hagerty and George Murtaugh, members of the 1925 Georgetown university football team will play professional football this season with the New York Giants, of the National professional football league, it was learned here today while they were visiting the George

town training camp. Murtaugh, a guard, already has signed articles and Hagerty shifty running halfback said that he had decided to accept an offer. It also was reported that Heine Jawish, who played in the other guard for Georgetown last year is going to perform with the Brooklyn eleven of Red

ing players that he will find room for them on the varsity.

Whether they can measure up to the expected standard set for them by Crum can better be told after they have shown some of their ability hereabouts in person, instead of through the medium of home town newspaper clippings.

### Knicks Meet Harps Sunday at the Park

"HOMES"

D. C., Baltimore, and College Park Claim Terrapins.

NIVERSITY OF MARYLAND holds an athletic position that doubtless is unique among the educational institutions of the country in that it has three "home"

The seat of the university is at College Park, and most of the 'home'' games are played in Byrd stadium there, but Baltimore, where all of the professional schools of the university are located, and Washington also are "home" to the Old Liners.

Maryland always plays one game in Baltimore, the annual clash with Johns Hopkins on Thanksgiving day being decided in the Monumental City, and if the Old Liners do not stage a contest in Washington this season it will be the first time in many years that they have not

lone so. In fact, Washington claims Maryland as one of its "home" teams, as it is perfectly justified in doing so, and not alone because the Old Line institution is situated only a few miles from the District of Columbia.

THERE are scholastic reasons for this also, as the College of Agriculture and the experiment station of the university are run in close cooperation with the United States Department of Agriculture, and for these reasons students matriculating from the District of Columbia are accorded the same privileges as those ed the same privileges as those from the State of Maryland.

A large percentage of the students at College Park are from the District of Columbia and the Wash-ington high schools contribute most materially to the Old Liners' ath letic teams.

The Knicks won the first game, played on Friendship field before the largest sandlot crowd of the season.

# **Everybody Worked But Father**

"Father's stomach trouble seemed to be getting worse all the time and finally he had to quit work altogether. Two brothers and myself gave up school and went to self gave up school and went to work to support the family. Father had lost 60 pounds in weight and was yellow as saffron and no medicine helped him. Telling a friend about it six months ago, she advised taking MAYR'S. I got a bottle and it helped father at once. He was able to go back to work a month able to go back to work a month later, has regained his weight and strength and eats like a wood chop-per." It is a simple, harmless preparation that removes the catarrhal mucus from the intestinal tract and allays the inflammation which causes practically all stomach, liver and intestinal ailments, including appendicitis. PATROLMAN'S DISMISSAL SET ASIDE ON APPEAL

Parkway, 12 Feet Wide, to Be Installed in Center of Calvert Street.

Preparations for a Ku Klux Klan parade Monday far exceeding in numbers the marchers of a year ago were ordered by the District commissioners yesterday. Not only was Pennsylvania avenue northwest ordered roped between First to Fifteenth streets, but an emergency was declared to exist necessitating suspension of days off for policemen the day of the parade and the

This program was laid out on ecommendation of Maj. Edwin B. Hesse, superintendent of police, who said in his report:

"Assembling of large numbers of persons in the District of Columbia to participate in and view the pa-rade of the Ku Klux Klan and cere-monies incidental thereto consti-tutes an emergency of such a nature as to require the continuous services of all the members of the metropolitan police force. From the best information I can secure, the number participating will far exceed that of the parade of 1925."

Patrolman H. J. Dorrenbacher won in his appeal to the commis-sioners from the verdict of the po-lice trial board, which ruled that he should be dismissed from the police department for conduct unbecoming an officer. It was alleged that he attacked Miss Jessie C. Lillie June 19 after accosting her and a man who was her companion in a parked automobile.

The commissioners concurred in the finding that he was guilty, but ruled that forfeiture by him of the pay he already had lost under suspension was sufficient penalty.
